

Time. Money. Ability.

It can be a challenge to track billable hours, especially time spent on your office phone. Sticky notes and scraps of paper take hours to reconcile, while manual timers work only if you remember to start them. It's been estimated that lawyers lose at least five billable hours each month on untracked calls and billing reconciliation. For an office of four, that can add up to \$5,000 or more of lost revenue every month.*

Now there's **Ability**™. It tracks all your billable phone time, no matter what type of device you're using.

- Quickly capture every call every time on every device, including mobile and desktop smartphones.
- Simplify billing reconciliation by creating an audio or text reminder about each call.
- Access, review, modify, and export your call records in real time from the cloud.

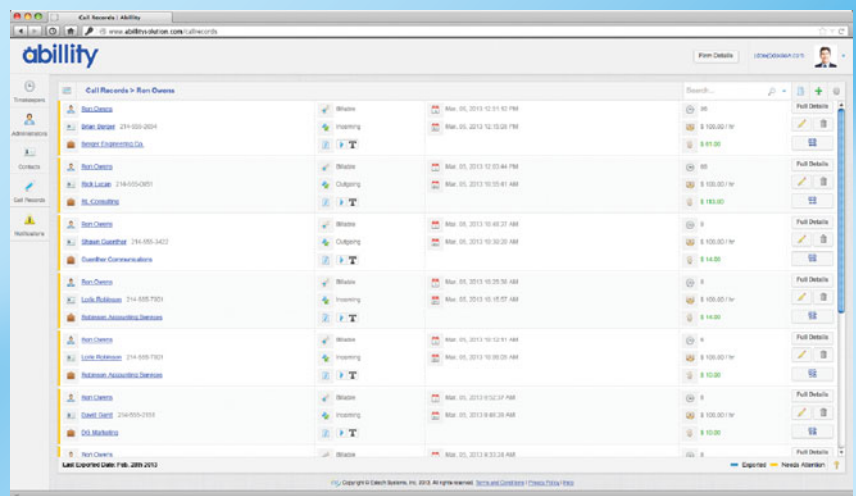

To learn more or to get started,
visit abilitysolution.com.

At the end of a call, Ability automatically prompts you to classify the call, record a quick note, and submit it to the cloud.

Features

- Capture every call every time
 - Compatible with mobile and desktop smartphones
 - Automatic real-time prompts to classify every call
- Simplify billing reconciliation
 - Audio and text notes to record a quick memo about the call
 - Export call records to a .csv file for integration with your accounting system
 - Role-based security for administrators and timekeepers
- Access call records from the cloud
 - Secure, real-time availability of your data from any browser
 - Review and modify call records any time, anywhere
 - 256-bit SSL data encryption in transit and at rest

Call records are available to review, modify, and export in real time from abilitysolution.com.
